

# Spirioso RZ F1

Cocktail tomato

## Deep red fruit with a very high brix level and larger fruit size potential

Spirioso brings a HR resistance to ToBRFV whilst producing beautiful deep red fruit with a very high brix level for the cocktail segment. The deep red colour extends through the fruit and the internal red colouration looks perfect when sliced into salads. The larger fruit size potential gives good yield performance which is coupled with an easy to manage plant. The shelf life of Spirioso exceeds the highest market standards so the deep red fruit stays looking great from the farm to the plate.

Sharing a healthy future

## Spirioso RZ F1 Cocktail tomato
